

OVERDRACHT

Freight forwarder management software

Run your entire freight operation from a single platform.

Shipments, containers, parcels, payments and disputes: Overdracht digitalizes your operations on Europe-Africa corridors, with real-time visibility from the departure agency all the way to delivery.

overdracht.io

Overdracht Software Inc. · Multi-agency SaaS solution

WHY OVERDRACHT

No more notebooks, Excel sheets and WhatsApp groups.

A freight forwarder handles dozens of parcels every day, across several agencies, with customers who want to know “where is my parcel?”. Without a dedicated tool, errors, losses and disputes become unavoidable. Overdracht was built for this specific trade.

WITHOUT A DEDICATED TOOL	WITH OVERDRACHT
Information scattered across notebooks, Excel and messages	A single file per shipment, accessible to the whole team
Impossible to know where a parcel stands without calling the agency	Statuses tracked in real time, from “Available” to “Delivered”
Parcels lost or impossible to find in the warehouse	Storage by scanned location: every parcel can be located
Disputes handled verbally, with no proof or history	Disputes opened, tracked and resolved in the system
Payments and amounts hard to reconcile	Payments linked to each shipment, in FCFA and in €
Unclear access rights across employees and agencies	Precise roles and permissions by module and by agency

The added value for your agency

Fewer errors, fewer disputes, more time for your customers. You gain control, credibility and the ability to grow your business without multiplying manual tasks.

KEY BENEFITS

Six reasons to choose Overdracht

1 Full visibility

Every shipment and every container has a clear, up-to-date status. You and your customers always know where the goods are.

2 Zero lost parcels

Location-based storage and parcel scanning ensure every parcel is identified and can be found in seconds.

3 Multi-agency

Manage your departure and arrival agencies (Yaoundé, Paris...) in a single system, with your warehouses and locations.

4 Secure delivery

The recipient presents a QR code: the parcel is handed over only to the right person, and the delivery is recorded.

5 Disputes under control

Damaged parcel, claim: every dispute is opened, tracked, resolved or reopened, with a full history.

6 Team under control

Assign roles and permissions by module. Everyone sees and edits only what concerns them.

Overdracht is a SaaS solution: no heavy installation. You log in from a browser, your data is centralized and your team works on the same information.

SHIPMENTS & KANBAN

Track every shipment, from departure to delivery

Create a shipment in a few clicks: sender, recipient, parcels, amount, and departure and arrival agencies. Find everything in a clear, filterable list, available at any time.

CONTAINER MANAGEMENT

Containers: a complete, traced workflow

Follow each container from planning to closure. A nine-step timeline lets the whole team know exactly where the load stands.

End-to-end workflow

- Planned, Loading, Sealed, On board
- Customs clearance, At port, Unloading
- Port exit, Closed

The whole file in one place

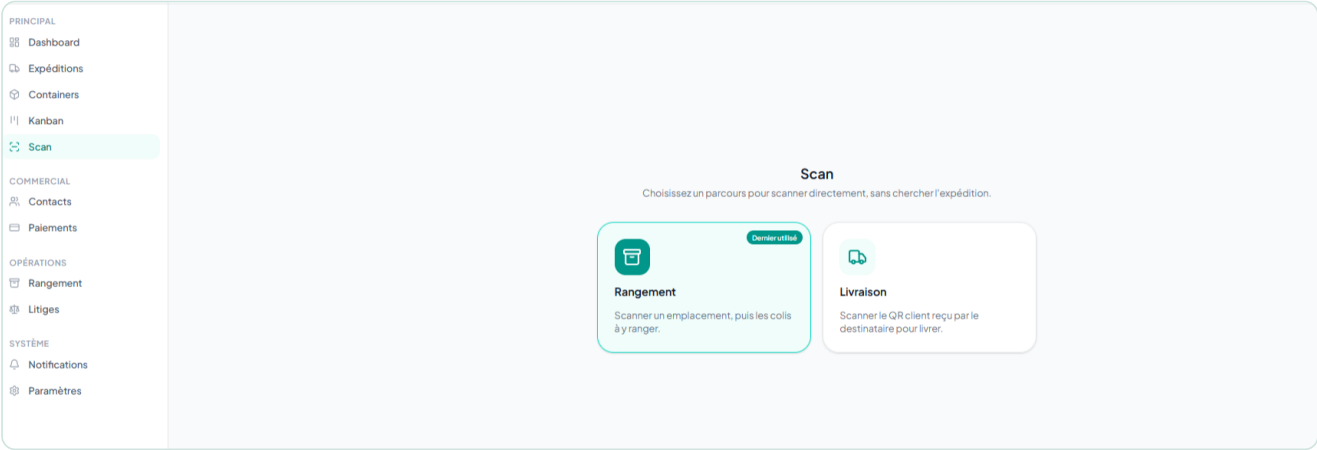

- Shipping line, departure and arrival ports
- Boarding and estimated arrival dates
- Seal number and bill of lading (B/L) as PDF
- Attached parcels and full history

Your customers no longer call you to find out where their goods are: the information is available, up to date and shared by your whole team.

WAREHOUSE OPERATIONS

Scan and storage: no more misplaced parcels

Your teams scan a location, then the parcels to put there. Two guided flows, without searching for the shipment: data entry is fast and reliable.

Full storage history

For each parcel: warehouse, location, employee who stored it, date and time. You know where the goods are and who handled them.

Secure delivery: the recipient presents the QR code they received; the agency scans it to hand over the parcel. No more approximate handovers.

DISPUTES & CONTACTS

Disputes and customers: stay in control and keep trust

A damaged parcel should no longer be a source of conflict. Each dispute is linked to its shipment, with a reason, a date and a status. Resolved? Reopen it in one click if needed.

ROLES, PERMISSIONS & SETTINGS

Your team, your rules

Configure the platform to fit your organization: agencies, users, warehouses, locations, parcel types. Each team member gets a role with precise rights by module.

The screenshot shows the 'Mon profil' (My profile) page in the Overdracht application. The left sidebar contains a navigation menu with categories: PRINCIPAL (Dashboard, Expéditions, Containers, Kanban, Scan), COMMERCIAL (Contacts, Paiements), OPÉRATIONS (Rangement, Litiges), and SYSTÈME (Notifications, Paramètres). The main content area is titled 'Mon profil' and includes a 'Mon profil' button, a list of settings (Agences, Utilisateurs, Rôles & permissions, Types de colis, Types d'emplacement, Dépôts, Emplacements, Abonnement), and a form for 'Informations personnelles'. The form has fields for 'Prénom' (joel), 'Nom' (temdie), and 'Email' (L'adresse email ne peut pas être modifiée). A green 'Enregistrer' button is at the bottom right. On the right side, there is a 'Mes accès' section with 'RÔLES' (Admin Entreprise, Global) and a table of 'PERMISSIONS PAR MODULE' with columns for module and action (Écriture).
